

GSM Security Burglar Alarm System - Solar Wireless Photobeam

Solar Wireless Photobeam

U.S. Alarm is an authorized dealer of Alarm.com, the leader in connected home technology. Through our Event Alarm.com service, we can enable your home or business security system to be controlled from your computer, smartphone, or any web-enabled cell phone. This interactive technology gives you the ability to monitor your home or business 24/7. Using wireless cellular signals, even if the phone or internet line is cut, the power goes out, or control panel is damaged, your system will continue to provide complete protection.

Below are samples of the user-friendly interface:

Smartphone As Your Keypad

Smartphone Apps can control Security Alarm, Security Camera & Home Automation

Mobile Apps | Geo-Services

Mobile Apps

Easy to use mobile apps from Alarm.com help you get more from your security system. Now it's simple to be in control, get alerts, manage your energy and watch video in the palm of your hand.

Easy access

Intuitively designed mobile interfaces make it easy to interact with your security system.

Instant awareness

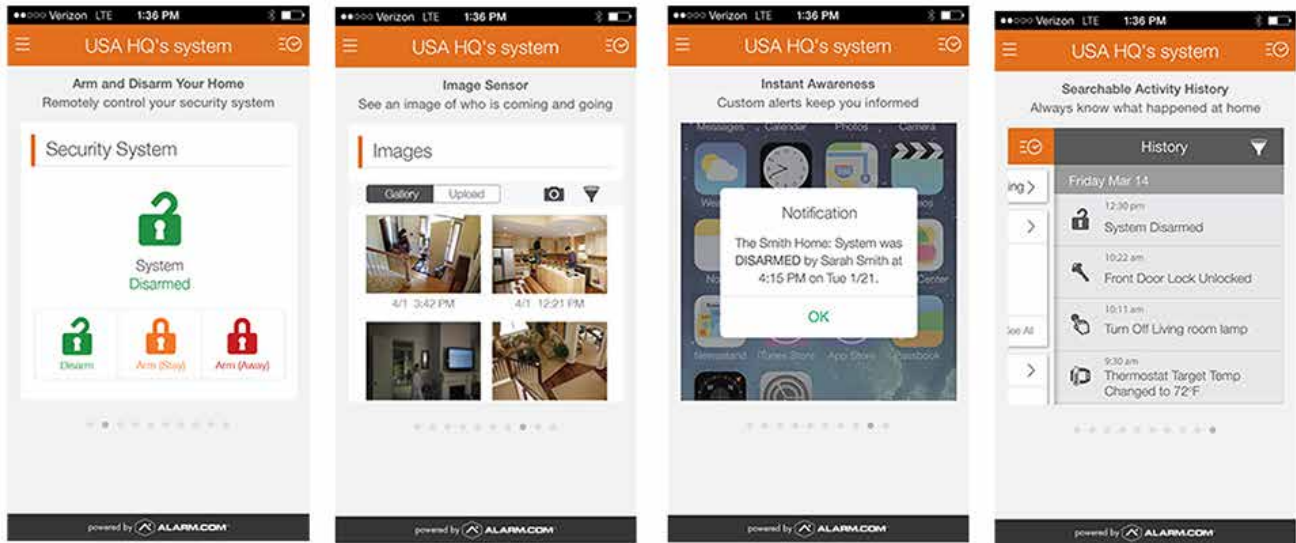

Real-time alerts are delivered right to your mobile device when activity takes place at your property.

Remote control

Arm your system or turn off the lights from your phone instead of having to return home if you forget.

Note: App functionality varies depending on service plans.
